WORK EXPERIENCE

Software Engineer

Freelance - Alexandria, VA
June 2020 to Present

Developed new data visualizations for a rehabilitation healthcare application.
◦ Angular.js, Node.js, Google Cloud

Software Engineer

Bizowie Cloud ERP
February 2020 to June 2020

Developed new software features and maintained functionality of a complex ERP software product written in Perl

- Implemented B2B software integration to provide data utility for our clients
 - Interacted with customers to resolve problems and perform implementation tasks
 - Collaborate closely with small group of developers to map out development goals that would improve product
 - Optimize the SDLC through change management and strict issue tracking
-

Software Engineer

Bank Of New York Mellon - Pittsburgh, PA
January 2018 to February 2020

Led development to stabilize and remediate a legacy trading application responsible for managing large volumes of cash transactions a week.

- Upgraded an Adobe FLEX based Web Application to Angular 6/Spring-Boot that can run at scale within BNY Mellon's proprietary cloud platform.
 - Patched major issues within a legacy system that introduced significant financial risks to bank's clients.
 - R&D - Worked with various teams within the business to gather requirements for new features and implemented various process improvements to support the bank's clients.
 - Participated in twice weekly stand-ups to address any issues with applications and outlined plans for future installments.
-

Code Advisor

Codecademy

April 2016 to January 2018

Maintained an 4.8/5 and better customer feedback rating.

- Taught Codecademy users programming basics, including object oriented design and application development
- Provided resources for learning outside of the scope of the available lessons
- Responsible for training users in HTML/CSS, JavaScript, Angular, Java, Python, jQuery, Git, and SQL
